

# Multi Fiat, Masternode and Crypto Community Exchange

CNexchange is a simple combination of two important words: crypto and community. Simple, yet strong and meaningful, our goal is to combine these two words and use them as guidelines in our business. We are the complete community centric Exchange where we value our users simply because they use our platform, our tools and they trust us to keep their money safe.

We aspire to be the cryptocurrency exchange of the community, by the community, for the community

## EXCHANGE FEATURES

Building a complete cryptocurrency exchange needs time, self-investment, and hard work. Perfection is hard to achieve, but it's our goal nevertheless. With that in mind, we selected a list of features that will be supported from day one.

### Transparency

Real-time settlement and consistent 24-hour trading operations with transparency of all the transaction records upon request.

### Security

Implemented security functions at both system level and operational level, 98% of funds are stored on Cold Wallet

### Speed & Performance

Peak order-making value is 1 million+/second and the order-processing peak value is 500k+ /second.

### Multi Fiat

You can buy Cryptocurrencies through your debit and credit card.

## CNEXCHANGE ECOSYSTEM

One of the main aspects of our product is technology. At CNexchange, we know this is the core of our business and with that in mind we added a list of features that will be supported on the initial release date of the exchange.

### Distributed revenue

50% of our revenue will be redistributed to the community through a redistribution program. The top 50 holders of our token will get 20% of the revenue to be distributed.

### EPP - Exchange partner program

Any user who holds more than 100,000 CNEX tokens will be eligible for a partnership directly with CNexchange.

### Quarterly Buyback & Burn Program

Every quarter 10% of the funds that come to CNExchange will be used to buy back CNEX and will be burned permanently till the time the total supply is reduced to half i.e. 200 Mn

### POS Wallets & Masternodes Pool

We plan to be one of the first exchanges to support a Masternode pool as well as staking rewards for its customers with Masternodes Pool and POS Staking

### Forks & Airdrops

Users will have the power to decide if CNExchange will support a fork or not. We will also support Monthly Airdrops

### Kickstarter

Through our Kickstarter program we want to help promising projects to reach their soft caps while hosting their token sale on our platform
